Job Description:

We are looking for a talented and experienced Dot Net and C# Desktop Application Developer to join our team. The ideal candidate should have a strong technical background and hands-on experience in developing Windows-based desktop applications using C#. As a C# Desktop Application Developer, you will be responsible for designing, coding, and testing software solutions that meet the requirements of our clients.

Responsibilities:

Develop high-quality Windows-based desktop applications using C#.

Collaborate with cross-functional teams to gather and analyze requirements.

Design and implement software solutions that meet the needs of clients.

Write clean, maintainable, and efficient code using best practices.

Debug and troubleshoot issues, providing timely resolutions.

Conduct code reviews and participate in technical discussions to ensure high-quality deliverables.

Stay updated on emerging technologies and industry trends related to C# development.

Collaborate with team members to meet project deadlines and deliverables.

Maintain documentation of software design, code, and implementation details.

Adhere to coding standards and software development processes.

Requirements:

Bachelor's degree in Computer Science or a related field.

- Minimum of 2-5 years of relevant technical experience.
- Strong proficiency in **Core C# programming language, including collections, generics, threads, TPL, events, delegates, Lambdas, GC, and file operations.**
- Experience in developing Windows Services, .NET Remoting, **WPF, Win Forms, LinQ**, and IPC.
- Proven track record of developing **MS Windows-based desktop applications.**
- Strong problem-solving and analytical skills.
- Excellent communication and interpersonal skills.
- Ability to work independently and as part of a team.
- Willingness to relocate to Bangalore as necessary
